CRT & Slimline Monitors Pack

A compact pack with 2 cozy low-poly monitors – a classic CRT and a vertical slimline screen, both with matching keyboards and emissive control.
Great for retro offices, sci-fi labs, and stylized projects.

Part of the Cosmic Retro series, URP-ready and mobile-friendly.

Key Features

2 FBX models & 2 prefabs
Low-poly stylized aesthetic
1× 8×8 px texture (PNG) & 1 material
Optimized triangle counts
Drag-and-drop prefabs
Demo scene included (URP only)

CRTSlimlineMonitorsPack Switcher

CRTSlimlineMonitorsPack.cs is a simple script that lets you toggle a retro computer screen ON and OFF by clicking it in Game view.
It switches the screen material (between normal and emissive) and shows or hides the text mesh.
All required references (renderer, materials, and text) are already assigned — just play the scene and click the screen.

Installation

Copy the CRT & Slimline Monitors Pack folder into your Assets/ directory.
For URP (recommended)2 assign the URP asset in Project Settings > Graphics.
For HDRP / Built-in2 drag the corresponding config files from Render_Pipeline_Setups/.
Open the demo scene from Demo_Scenes/URP/ (URP only).
Drag any prefab from Prefabs/ into your scene and start building.
